

[FREE SEMINAR]

Waters ACQUITY™ UPLC™ Care and Feeding Seminar

Tuesday, July 31, 2018

University of Missouri - Columbia

Bond Life Sciences Center

Room 572

1201 Rollins Street

Columbia, MO 65201

Seminar: 9:00am-12:00pm

Please join Dr. Lloyd Sumner's lab and Waters for a free learning event.

In 2004, separation science was revolutionized with the introduction of Waters' Ultra-Performance Liquid Chromatography [UPLC Technology]. Significant advances in instrumentation and column technology were made to achieve dramatic increases in resolution, speed and sensitivity in liquid chromatography. Whether the separation goal is to achieve ultra-fast analysis, increase throughput while maintaining resolution, improving resolution while decreasing analysis time or achieve ultra-high resolution, the flexibility of the ACQUITY UPLC Systems enable method requirements to be met.

Join us for a technology seminar designed to provide new, existing and potential UPLC users the ability to understand how UPLC Technology works, and best practices for successful operation and maintenance.

Register online at www.waters.com/UPLCCareFeeding18

For additional information or questions regarding the seminar please contact Mary_Framsted@Waters.com

**Continental breakfast will be provided.*
